James Frost's Featured Product:

**ASKO** Wine Climate  
Inspired by Scandinavia Cabinet

### Optimum Humidity

The Wine Climate Cabinet keeps the humidity level around 70% - an optimum level for wine storage. You can check the humidity levels at any time - either in the UI or in the app.

### Room For The Whole Collection

The Asko Wine Climate Cabinet has room for up to 190 bottles, storing them in roomy telescopic shelving systems which are easy to access. Small chalkboards let you label your collection on the shelves,

### Virtually Free From Vibrations

The Wine Climate Cabinet's high quality compressor ensures consistent temperatures in each compartment. And since wine likes to rest peacefully, this wine climate cabinet is almost vibration-free.

### Three Discrete Zones

Since Different wines require different temperatures, the Asko Wine Climate Cabinet contains three temperature zones. They're perfectly sealed from one another and the temperatures are kept at an exact and even level.

### No Harmful Light

Another important aspect to storing wine is keeping it from harmful UV light. The door of the Asko Wine Climate Cabinet protects your collection from lights that could potentially damage the wine.

### The Right Temperature

Precise temperature controls lets you choose whether you want to store and age your wines, or bring them to serving temperature.
