THE

We Obsess About The Details So You Don't Have To.

For more than 50 years Lutron has been singularly focused on creating innovative products that are built to last. The result? Lutron is the #1 lighting control and motorized shading brand with top home technology professionals for 9 consecutive years and counting. All Lutron products come with a comprehensive warranty and in the unlikely event you'll need to use it, our team is here for you.

About RadioRA3

RadioRA 3 home automation by Lutron gives you powerful control over your lights, Lutron smart shades, and other smart home devices, all wrapped in a beautiful design that will complement any décor. So, you can effortlessly create a comfortable environment throughout your home with the app, voice assistant or a simple touch of a keypad.

RadioRA3 was developed to work in any residence, new or existing.

We can install keypads, sensors, light, fan, temperature and appliance controls, as well as shades to create a system that will best suit your needs. And you don't have to worry about the type of lighting in the home, either. Whether you have LED, halogen, incandescent, electronic low-voltage, magnetic low-voltage, or fluorescent lights, RadioRA 3 will provide the control you need.

The Benefits Of Total Home

Total home control is the ability to adjust the amount of daylight and artificial light, the temperature and the power used by appliances in a room, or throughout your home.

With Lutron, you can:

- **Save energy** and lessen your impact on the environment. The benefits of RadioRA 3 are brought to your home through a combination of light, shade, and temperature, and appliance control.
- **Add convenience to your daily life.** With a total home control system, you can adjust lights, shades and temperature to the specific level you want, in a particular room, or throughout your house - at the touch of a button.
- **Create just the right mood or ambiance** for any activity - and do it with stylish products that complement your home's décor.
- **Add cutting edge technology to your home.** With RadioRA 3, you can control lights, shades, temperature and appliances from wall mounted, tabletop, handheld controls, your mobile devices or even voice control - even from outside your home.

Welcome Home to Peace of Mind

With RadioRA 3 your family will always come back to a well-lit home. You can schedule lights inside and outside your home to come on at a specific time of day, even timing them around the rising or setting of the sun. The system will ensure the lights come on without fail and automatically adjust when the seasons change and you gain or lose an hour with daylight savings time.

Look Like You're Home, Even When You're Miles Away

With Lutron smart lighting controls and smart blinds, you can create the illusion you're home, even when you're not. Simply set your shades to close at sunset and then activate Vacation Mode in the Lutron app so your lights will turn on and off at different intervals throughout the evening.

Convenience in a Keypad

Getting out of the house has never been easier. With RA 3 you can turn off the lights, stop the music, and drop the shades all with one simple button push. Convenience has never felt or looked so good.

Beautiful Wall Controls

One Cohesive, Modern Look

RadioRA 3 dimmers, switches and keypads feature a single cohesive and modern design. With the innovative light bar design, RA 3 wall controls look great in any décor, and in every room.

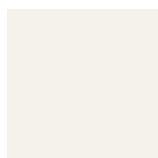

Intuitive Design

The wall controls all feature an LED light bar for easy and intuitive control of your lighting. Simply touch or swipe the light bar on a dimmer to set your lights to the preferred level.

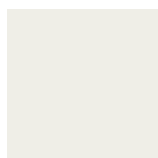

Colors for any Décor

RA 3 dimmers, switches, and wallplates come in a full range of versatile colors and finishes—24 in all—so you can find the perfect match for your home décor whether contemporary, traditional, or anything in between.
